
Dear Supermarkets,

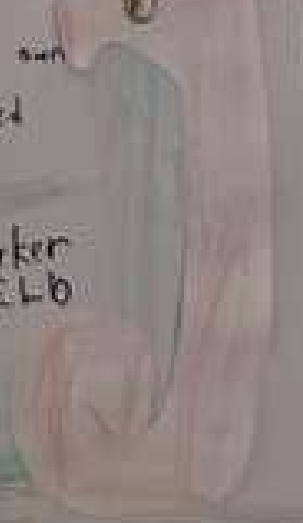
THERE IS A GIANT PROBLEM!

Plastic is harming animals and causing an enormous problem for our planet. you could help to make the biggest difference and help all the animals living on both land and sea. I have been looking in your supermarkets and have found alot of plastic contributing to the problem. Plastic sticks around for ages and threatens wildlife and spreads toxins.

These are some products you could look to improve.

wrappers on APPLES, ORANGES, BROCCOLI, CUCUMBER, GRAPES, BANANAS, CARROTS, POTATOS AND PEPPERS!

Most of these items have their own skin and those that dont can be washed before we eat them.



TALK CHART
a chart friends and neighbours if any paper and show are the results
